

KX-NT630 & KX-NT680

FEATURE RICH, FUTURE READY, ERGONOMIC & CUSTOMER FRIENDLY

Intuitive Operation

Making all information visible at a glance is never easy. By using the highly intuitive colour LCD screen, every detail is visible with colour or icons providing understandable information.

Customisation

The KX-NT680 can import an image file to display on the LCD. Corporate branding or corporate information can be easily brought throughout the organisation by customising the colour LCD screen. During use, the information is visible at all times for the user to understand.

Secure Real-Time Transport Protocol (SRTP)

IP communications are becoming more susceptible to attacks. By supporting SRTP we encrypt our communication packets and create a secure and solid communication channel.

Centralised Management

Setting up a terminal difficult? Not with the centralised management embedded. All settings can be transmitted by the network and adjusted remotely. Administrators on the communication network enable different parameters easily.

NEW IP HANDSETS FOR THE NS & NSX SERIES*

KX-NT630
